

6516206006.txt

I travel for business and the XM Radio Network is very beneficial to me as it is a constant. I'm not always searching for a local station that I probably won't be able to clearly receive anyway. There are numerous channels that I enjoy listening to and those include news, sports, and weather. It should be self evident as to why the traffic reports would be helpful. As a registered voter I ask that the congress stop this silliness and leave capitalism to run its course. If the NAB has a better product then it'll survive on its own without help from the government.
